GLEN CARRON BENEFITS

- **High percentages of Class 1 fruit (93.3% marketability)**
- **Offers large and consistent fruit sizes. Mean berry: 5.3g, largest fruits 6.3g**
- **Glen Carron's large fruit reduces picking costs whilst de-plugs easily**
- **A leader in its class regards flavour and eating quality**

Formerly known as advanced selection 0485K-1, Glen Carron is the latest variety to be released from the James Hutton Limited raspberry breeding programme. Glen Carron was launched in 2018 having been identified as a promising florican type in 2010. Promoted as a specialist early variety, typically producing high percentages of class 1 fruit with both distinct sweet flavours and striking 6g+ fruits. From a commercial grower perspective, the hairy canes that produce the sweet-tasting, beauty also offer up excellent resistance to cane diseases. Glen Carron yields a high proportion of Class 1 fruit which, alongside good shipping and fantastic shelf-life, will contribute to reducing food waste.

Agronomy -

Season: Early/Mid

Cropping Period: Early July - Early August

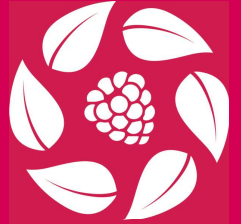

Picking Duration: 4 weeks

Chill Requirement: Min. 1200 hours

Cultivation -

Suitable for open field, soil-grown, or substrate. Aim for 10,000 plants per Ha. 60cm short cane, 40cm long cane

GLEN CARRON REVIEWS

"Currently the best stored long cane variety on the market"

Janet Allen – ADAS – Fruit Focus 2019

"The best performer from the samples seen in the UK... very juicy texture, good size berry with consistent purple colour, light aromatic and sweet with very promising properties."

Sabina Wyant - TESCO - Fruit Focus - 2019

"Glen Carron combines reduced picking costs, excellent resistance to cane diseases with a consistent, superb raspberry flavour"

Nikki Jennings – Plant Breeder - JHL - 2019
